

**Subpart D—Conditions on Acceptance/  
Use of Federal Money**

- 84.40 What conditions must I follow to accept Federal grant money?
- 84.41 Who prepares a grant agreement? What needs to be included?
- 84.42 What if a grant agreement is not signed?
- 84.43 How do States get the grant monies?
- 84.44 What is the timetable for the use of grant money?
- 84.45 How do I amend a proposal?
- 84.46 What are the cost-sharing requirements?
- 84.47 What are allowable costs?
- 84.48 What are the procedures for acquiring, maintaining, and disposing of real property?
- 84.49 What if the project costs more or less than originally expected?
- 84.50 How does a State certify compliance with Federal laws, regulations, and policies?

AUTHORITY: 16 U.S.C. 3951–3956.

SOURCE: 67 FR 49267, July 30, 2002, unless otherwise noted.

**Subpart A—General Background****§ 84.10 What is the purpose and scope of this rule?**

The regulations in this part establish the requirements for coastal State participation in the National Coastal Wetlands Conservation Grant Program authorized by Section 305 of the Coastal Wetlands Planning, Protection and Restoration Act (Pub. L. 101–646, title III; 16 U.S.C. 3954). The primary goal of the National Coastal Wetlands Conservation Grant Program is the long-term conservation of coastal wetlands ecosystems. It accomplishes this by helping States protect, restore, and enhance their coastal habitats through a competitive grants program. Results are measured in acres protected, restored, and enhanced.

**§ 84.11 How does the Service define the terms used in this rule?**

Terms used have the following meaning in this part:

*Coastal barrier.* A depositional geologic feature that is subject to wave, tidal, and wind energies; protects landward aquatic habitats from direct wave attack; and includes all associated aquatic habitats such as adjacent wetlands, marshes, estuaries, inlets, and

nearshore waters. These can include islands; spits of land connected to a mainland at one end; sand bars that connect two headlands and enclose aquatic habitat; broad, sandy, dune beaches; or fringing mangroves. Coastal barriers are found on coastlines including major embayments and the Great Lakes of the United States and its territories.

*Coastal Barrier Resources System.* A defined set of undeveloped coastal areas, designated by the Coastal Barrier Resources Act of 1982 (Pub. L. 97–348) and the Coastal Barrier Improvement Act of 1990 (Pub. L. 101–591). Within these defined units of the System, Federal expenditures are restricted to discourage development of coastal barriers.

*Coastal States.* States bordering the Great Lakes (Illinois, Indiana, Michigan, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin); States bordering the Atlantic, Gulf (except Louisiana), and Pacific coasts (Alabama, Alaska, California, Connecticut, Delaware, Florida, Georgia, Hawaii, Maine, Maryland, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Oregon, Rhode Island, South Carolina, Texas, Virginia, and Washington); and American Samoa, Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the Virgin Islands. (Louisiana is not included because it has its own wetlands conservation program authorized by the Coastal Wetlands Planning, Protection and Restoration Act and implemented by the Corps of Engineers with assistance from the State of Louisiana, the Environmental Protection Agency, and the Departments of the Interior, Agriculture, and Commerce.)

*Coastal wetland ecosystems.* Ecosystems that consist of multiple, inter-related coastal land features. They include wetlands in drainage basins of estuaries or coastal waters that contain saline, brackish, and nearshore waters; coastlines and adjacent lands; adjacent freshwater and intermediate wetlands that interact as an ecological unit; and river mouths and those portions of major river systems affected by tidal influence—all of which interact as an integrated ecological unit. Shorelands,
